12:30-2:45 pm Alice Williams – Hot Air Balloon –Make a Hot Air Balloon. Everything will be cut out and the crafter will paint the paper fasteners. Crafters bring a smile and laughter. Cost \$15. Limited to 15 students. Sign up and pay at “Information”. Hangar C Front

JJ Tucker – Beaded Necklace – Come spend a few hours of fun making a necklace you’ll be proud to wear. All supplies and instruction will be provided. If you need a task light and those pesky closeup glasses please bring them as we will be working with beads. An extension cord for that light would be helpful too. You’ll also be able to pick colors. Students 15-20. Cost \$20 Cessna Building

3:00-4:00pm RV Whisper – You will learn how most RV Tank monitor systems work, including what the sensors look like, how they are installed, and how the monitor panel talks to them to determine tank levels. The root cause of the very common problem: “My black tank always says full” will be presented, along with several ways to fix it. Other common tank monitor problems and their root causes will be presented. For those with electronics background, there will be a brief discussion of how the tank sensor system can be modeled as a simple resistor only network or more accurately as a more complex RC network.
